

GIORGIO TEDDE

Giorgio Tedde, composer, works in Europe, Asia and America. His early training was based on a 'scientific' approach, but subsequently he decided to humanise his artistic conception by concentrating on the issues of the audience's perceptions and, more in general, of communication through music.

He teaches composition and acoustics in Italian and Swiss high schools.

The work of art that establishes a dialogue with its audience and reaches the emotions is the final stage in a journey which he has undertaken with passion and tenacity.
